Established in 1904 as the Department of Geology, and later known as the Department of Geological and Geophysical Sciences, the Department of Geosciences has grown to become the center for the study of Earth, atmospheric, oceanographic, and environmental sciences at Princeton. Geoscientific studies at Princeton University date from 1854, when Arnold Guyot was appointed Professor of Geography and Physical Geology. Guyot was the sole instructor in geological sciences for 19 years and he was primarily responsible for the creation of the Geological Museum (located first in Nassau Hall and later in Guyot Hall), which grew from the fossils and geological specimens he collected for instructional purposes.

Even in its early years, the department was a leader in geological and paleontological fieldwork. In 1877, three of Guyot's students - William Berryman Scott, Henry F. Osborn and Francis Speer - participated in Princeton's first field expedition to Colorado and Wyoming in order to collect vertebrate fossils. It was the first in a series of expeditions to the American west made by Princeton students and faculty, eight of which Scott himself led between 1882-1893. Scott was awarded the Blair Professorship of Geology and Paleontology in 1884 and was the department chair from 1904-1930.

In 1909, five years after its founding, the Department of Geology moved into its home in Guyot Hall, a facility that also housed the department's growing Geological (or Natural History) Museum. Guyot Hall was designed by members of the department and funded by the mother of Cleveland H. Dodge (Class of 1879) who was a University trustee.

In 1926, Richard M. Field initiated Princeton's Summer School of Geology and Natural Resources, a still-extant annual field course designed to teach students in techniques of geological and geophysical research. Under the tenure of chairman Harry H. Hess (1950-1966), the Department of Geology expanded its course offerings to touch on many subjects under the umbrella of geological science. In 1968, the name of the department was changed to the Department of Geological and Geophysical Sciences to reflect the new curriculum. The department became known as the Department of Geosciences in 1996.

The records document the department from its 19th-century origins to the recent past with departmental files, faculty files, faculty meeting minutes and visual materials. In Series 4, a variety of materials document significant figures in the department such as Arnold Guyot, Richard Field, and William B. Scott. A consistent run of faculty meeting minutes in Series 4 provides a detailed picture of the department’s development over the course of the 20th century.

The records are rich in photographs, slides and film that document many of the department’s expeditions and excavations in North America—primarily in the American West. Photographs and negatives appear throughout the records, and not only in Series 7: Photographs. Both Series 5: Field Trips and Expeditions and Series 6: Natural History Museum contain a subseries of photographs.

The collection also includes the records of the defunct organization the American Institute of Geonomy and Natural Resources.
Histories of the department written by members of the department appear in Series 3: Department Administration under "Department Histories."

**Access and Use**

**Access**

The Department of Geosciences Records are open for research. Due to the presence of student educational records and personnel records, access to certain folders is restricted. See individual folder restrictions for more information.

Access to glass-plate negatives is restricted due to their fragility. Where prints of the negatives are present, the prints are open for research use. Though digitization may not be possible for every negative, researchers may make requests to digitize material according to Mudd Library’s policy on digitization of photographs.

For a general guide to access restrictions, please see the Access Policy for Princeton University Archives Collections

**Restrictions on Use and Copyright Information**

Single photocopies may be made for research purposes. For quotations that are fair use as defined under U. S. Copyright Law, no permission to cite or publish is required. The Trustees of Princeton University hold copyright to all materials generated by Princeton University employees in the course of their work. If copyright is held by Princeton University, researchers will not need to obtain permission, complete any forms, or receive a letter to move forward with non-commercial use of materials from the Mudd Library. For materials where the copyright is not held by the University, researchers are responsible for determining who may hold the copyright and obtaining approval from them. If you have a question about who owns the copyright for an item, you may request clarification by emailing mudd@princeton.edu.

**Other Finding Aid(s)**

Full text searching of this collection's archived website is available through the Archive-It interface.

**Acquisition and Appraisal**

**Provenance and Acquisition**

**Appraisal**

Duplicates and published volumes available elsewhere have been separated from the records. Grades from summer field courses during the years 1955-1990 have been separated from the records.
Related Materials

Related Archival Material

Researchers interested in these materials may also wish to consult the Princeton Scientific Expeditions Collection (AC012), Series 2: Geological Expeditions. In addition, the Department of Rare Books and Special Collections at Firestone Library holds the William Berryman Scott Papers (C0265); a collection of William Libbey Correspondence (C0872); the Charles Henry Smyth Journals (C0823); the Arnold Guyot Collection (C1095); and the Arthur Buddington Lantern Slides of Russia (C1448).

Processing and Other Information

Preferred Citation

Identification of specific item; Date (if known); Collection Title, Box and Folder Number; Department of Rare Books and Special Collections, Princeton University Library.

Works Cited

In the composition of this finding aid’s organizational history, the history section of the Department of Geosciences’ website (http://www.princeton.edu/geosciences/about/history/) and Alexander Leitch’s A Princeton Companion were consulted.

Processing Information

This collection was processed by Lynn Durgin in October 2010. Finding aid written by Lynn Durgin in October 2010. After significant accessions, the finding aid was revised by Phoebe Nobles in 2018. Materials were added from Accession AR.2019.043 by Kimberly McCauley in July 2019.

Series 1: Alumni and Students, 1913-2007

Access:
Series 1 is open for research. Due to the presence of personal academic information, access to certain files is restricted at the folder level as noted.

Arrangement: Files are arranged physically in the order in which they were received from the department.

Description: Series 1: Alumni and Students includes files the geology department maintained on undergraduate and graduate students and alumni. The files include lists of students and their theses. Individual files may include correspondence with or about an alumnus; clippings; photographs; a curriculum vitae, and so on. Material created by undergraduates includes a 1979 guide to the department and a geology notebook from 1938.

Series 2: Associations, 1899-1970

Access:
Series 2 is open for research.

Arrangement: The files are arranged in the order in which they were received from the department.

Description: Series 2: Associations contains records of various geology-related associations or organizations, including some records of the Geology Club at Princeton; the Princeton
Geological Association; and the Geological Society of America; as well as the records of the American Institute of Geonomy and Natural Resources (an organization led by Princeton faculty members, though it was not headquartered at Princeton).

American Institute of Geonomy and Natural Resources Records, 1952 October 13-1970

Size: 0.5 linear feet

Biography/History: The American Institute of Geonomy and Natural Resources, Inc. was established in 1952 by Richard M. Field, Arthur Murphy, Fanny Field and others to gather and disseminate scientific information and to conduct research "in respect of the art of living," as stated their By-Laws. The organization was led by two Princeton faculty members, Richard Field, and W. Taylor Thom, Jr. before it was disbanded in 1969. Documentation in the files indicates that the Geology Department was designated as the repository for the records.

Description: The Institute of Geonomy and Natural Resources records include the organization's by-laws, articles of incorporation, correspondence, bulletins, annual reports and financial information.

Arrangement: The files in this group have been maintained in the order that they were received.

Access:
The files of the American Institute of Geonomy and Natural Resources are open for research.

Access:
Series 3 is open for research with some exceptions. Access to advisory council reports, reports to the president, and financial records from the past 30 years is restricted; such materials older than 30 years are open for research. Due to the presence of student academic information or personnel matters, access to certain folders is restricted at the folder level as noted, for periods up to 75 years. Access to glass-plate negatives is restricted due to their fragility. Where prints of the negatives are present, the prints are open for research use. Though digitization may not be possible
for every negative, researchers may make requests to digitize material according to Mudd Library's policy on digitization of photographs.

Arrangement: The files are arranged physically in the order in which they were received from the department (often in alphabetical runs). The archivist grouped files loosely by subject for the purposes of this finding aid only.

Description: Series 3: Department Administration contains various files maintained by the geology department, including information on course planning and course offerings; department histories often written by members of the department; departmental reports to the university president; plans for and assessment of the department's structure and academic foci; budgets and allocated funds; and records of the Geological Engineering Program. The files include correspondence, clippings, newsletters (especially The Smilodon), pamphlets, and maps.

Series 4: Faculty and Staff, 1845-2012

Description: Includes invitation to a Dinosaur Tea with Professor Henry Fairfield Osborn, letter by B.F. Howell, and copies of letters of William Scott.

Access:
Series 4 is open for research, with some exceptions. Access to faculty meeting minutes is restricted for 75 years from the date of their creation. Due to the presence of personnel information, access to certain files is restricted at the folder level as noted. Access to glass-plate negatives is restricted due to their fragility. Where prints of the negatives are present, the prints are open for research use. Though digitization may not be possible for every negative, researchers may make requests to digitize material according to Mudd Library's policy on digitization of photographs.

Arrangement: The files are arranged physically in the order in which they were received from the department. For the purposes of this finding aid, the archivist grouped multiple files on individual faculty members.

Description: Series 4: Faculty and Staff includes faculty meeting minutes; basic files the department maintained on faculty members (which may include clippings, correspondence, curriculum vitae, and photographs); as well as the more extensive files of longtime faculty members such as A.F. Buddington, B.F. Howell and William Taylor Thom. Files on Arnold Guyot primarily contain research about Guyot; other faculty files may have been maintained by the faculty themselves and include material such as correspondence (some personal); publications; course and lecture materials including examinations; diaries and field notes; biographies and bibliographies; faculty contracts and recommendations; photographs; and an autograph book as well as letters kept primarily for autographs. William Bonini's files include a box of his gravity journals, notebooks of field observations. Researchers seeking information on faculty-led field trips should also consult Series 5: Field Trips and Expeditions. Photographs of faculty and staff are present in Series 4 in Series 5, and in Series 7: Photographs. Researchers seeking information on faculty member Glenn Jepsen may also wish to consult Series 7: Photographs, which contains a subgroup of Jepsen's photographs.

Faculty Meeting Minutes, 1905-1994

Size: 2.0 linear feet

Description: The faculty meeting minutes consist primarily of bound volumes, with the exception of the earliest minutes (1905-1920), which are a mixture of hand-written and typed documents. The minutes document the department's courses, initiatives, governance, grading parameters, and related matters throughout the 20th century.

Access:
Faculty meeting minutes are restricted for 75 years from the date of their creation.

General Correspondence, 1879-1997

Description: Includes letters from Teilhard de Chardin and Louis Leakey

Autographs, 1879-1969
Description: Collected by Jepsen, Thom, Howell

Letters, 1941-1997
Description: Most addressed to Peggy Cross

Letters of Historical Interest, 1901-1920

William Bonini, 1948-2004

accessionnumber: AR.2016.117
Size: 1 linear foot
Size: 1 box
Description: William Bonini's gravity journals consist of handwritten field notes and drawn notes from Professor Bonini's expeditions to the western part of the U.S. and other areas. These notes were used to document the scientific observations he made during the course of his research.

Arrangement: The materials retain their original order.

Series 5: Field Trips and Expeditions, 1854-2001

Access:
Series 5 is open for research.
Access to glass-plate negatives is restricted due to their fragility. Where prints of the negatives are present, the prints are open for research use. Though digitization may not be possible for every negative, researchers may make requests to digitize material according to Mudd Library's policy on digitization of photographs.

Arrangement: The files are arranged physically in the order in which they were received from the department. For the purposes of this finding aid, the archivist has arranged the series into time periods and photographic material as noted below.

Description: Series 5: Field Trips and Expeditions documents geology department travels, to the American west in particular. The series is grouped into early expeditions (19th century), expeditions between 1900 and 1924, and expeditions after 1924. Photographs are present throughout the records, but folders and albums that contain almost entirely photographs have been placed in the subgroup "Photographs." Another subgroup, Summer Field Courses, contains records of summer trips beginning with the Pullman car excursions of 1926 through the field courses of the 1990s.
There is overlap between this series and Series 7: Photographs, particularly the latter series' subgroup "Events and Trips." The division of the two series reflects to some extent the geology department's record-keeping practices. The department kept extensive files grouped under "Field Trips" as well as files grouped under "Photographs."

Early Expeditions, 1854-1996

- **Book of Mineral Expeditions, 1854-1861**

Chaco Canyon, Negatives and Prints, 1939
Noble Site, 1967
Summer Field Courses, 1926-1991
Geology 311 Course Information, 1940
Geology 313 Excursions, to Chaco Canyon, New Mexico, Photograph Album, 1939
Princeton Summer School of Geology and Natural Resources (Trip to Montana, Colorado and Utah), Photograph Album, 1940
Diary and Scrapbook of Canadian Field Trip, Summer School of Geology, 1927-1972
Description: The scrapbook documents a field trip taken by professors and students across Canada by rail for the 1927 Summer School of Geology. Included are photographs of R. M. Field and student participants, a typewritten chronicle of the trip, articles, maps and items of ephemera.
Log of Joint Trip of the Summer School of Geology and School of Public Affairs across Canada, by M.C. Dittmann '1935, 1934
Summer Camp: Red Lodge, Montana, 1932-1937
Description: Papers relate to the Red Lodge Research Camp and the Yellowstone-Bighorn Research Association.
Summer School of Geology and Natural Resources, 1926-1932
Description: Informational posters and trip booklets.

Field Course--1990, 1990

Description: Grade sheets were removed from all field course folders

Field Course--1989, 1989
1985 Field Course, 1985
1984 Field Course, 1984
1983 Field Course, 1983
1982 Field Course, 1982
1981 Field Course, 1981

Geology Field Trips before PR/MBRA course, 1954-1957

Description: Correspondence re: lodging.

Access:
This folder is restricted until 2045 due to the presence of student grades.

PR/YBRA Field Course Miscellaneous, 1971-1990
Red Lodge Cover Photo, etc., undated

Description: Photocopies

Memorabilia-1926 Train Trip, 1926-1990

Description: Geology 307 summer field trips in Pullman car

Princeton Pullman--1926-1927 Field Trips, 1965-1972

Description: Correspondence

1926--Some Financial Statements, 1926-1928

Description: Expedition accounts

1926 Cross Country Field Trip by Pullman Car, 1926-1982

Description: Summer School pamphlet, clippings, negatives

Buddington Journal--Princeton Summer School Trip, 1926
1928-1929 Summer Trips--Photographs, Itinerary, 1928-1972
Summer School Trip 1931, 1931

List of Field Maps, undated
Box: 35

Series 6: Natural History Museum, 1854-2014

Access:
Series 6 is open for research. Due to the presence of personnel information, access to certain files is restricted at the folder level as noted. Access to glass-plate negatives is restricted due to their fragility. Where prints of the negatives are present, the prints are open for research use. Though digitization may not be possible for every negative, researchers may make requests to digitize material according to Mudd Library's policy on digitization of photographs.

Arrangement: The files are arranged physically in the order in which they were received from the department.

Description: Series 6: Natural History Museum contains files that relate directly to the Natural History Museum in Guyot Hall. The series contains records of collections, exhibits and loans, as well as records of the major museum deaccession of fossils in the 1980s.

Cases, 1936-1977

Miscellaneous Formations and Localities, 1907-1956  
Box: 38

Northwest Indians, 1965-1997  
Box: 38

Museum Newspaper Clippings, 1930-1985  
Description: Clippings  
Box: 38
### Series 7: Photographs, 1870-2005

**Access:**
Series 7 is open for research. Access to glass-plate negatives is restricted due to their fragility. Where prints of the negatives are present, the prints are open for research use. Though digitization may not be possible for every negative, researchers may make requests to digitize material according to Mudd Library's policy on digitization of photographs.

**Arrangement:** The files are arranged physically in the order in which they were received from the department. For the purposes of this finding aid, the archivist has grouped the photographs loosely into three categories.

**Description:** Series 7: Photographs contains files which for the most part were grouped under the heading "Photographs" by the department. The files include photographs of faculty, staff, undergraduate and graduate students; of field trips and scenery; of events on campus; and of campus buildings. The files in Series 7 tend to contain photographs almost exclusively, while many folders throughout the rest of the Department of Geosciences Records contain photographs stored together with other materials. Note that both Series 5: Field Trips and Expeditions and Series 6: Natural History Museum also contain subgroups called "Photographs." Photographs of individual faculty and staff are often found in their files in Series 2.

#### Campus, 1911-1992
- **Buildings 1992--Sayre Hall (Photographs), 1992** Box: 16
- **Van Ingen's Photographs, 1911-1916** Box: 43
- **Photographs, circa 1916-1918** Box: 43
  - Description: Includes site of Engines and Airplanes Building
- **Campus Photographs, 1975-1983, undated** Box: 43

#### Events and Trips, 1885-2005
- **Professor Glenn Jepsen's Photographs, Slides and Film, 1957-1971**
  - Size: 1.46 linear feet
  - Description: A variety of photographic and film formats of expeditions, excavation sites and specimens.
Arrangement: The materials have been grouped according to format.

Green River Polaroid Photographs, undated  Box: 10
Size: 1 packet of Color/Type 108 Film, Polaroid Photographs

Kodak Golden Valley, Loeb Globe, and Miscellaneous Photo Negatives, 1959-1960  Box: 10
Size: 3 elliptical reel-boxes of photo negatives in a cardboard elliptical reel-box
