Biography/History

Charles F.W. McClure (1865-1955) was a comparative anatomist and embryologist. Born in Cambridge, Massachusetts, in 1865, McClure attended Princeton University and received his B.A. in 1888. He continued his studies at the College of Physicians and Surgeons at Columbia University, as well as in Europe at universities in Berlin, Kiel, and Wurzburg. In 1891, he returned to Princeton as an instructor of biology, later becoming assistant professor, professor of comparative anatomy, and professor emeritus. He authored numerous papers on the anatomy and development of the vascular system in vertebrates, among other subjects. McClure died in 1955.

Description

The collection contains approximately 1200 letters sent to Dr. Charles F. W. McClure (Princeton Class of 1888), a professor in the Princeton University Biology Department, by numerous biologists and anatomists from the international academic community. A sizable portion of the correspondence is between McClure and his close associates, including his former instructor Henry Fairfield Osborn (whom McClure would later succeed at Princeton) and his frequent collaborator, George Sumner Huntington, professor of anatomy at the Columbia University College of Physicians and Surgeons.

McClure studied a wide variety of animal specimens, both living and dead. During his time at Princeton, he built a comparative anatomical collection using specimens from a number of sources including zoos, circuses, and animal dealers. Correspondence with early 20th-century animal dealers such as William Bartels and J.S. Edwards documents this practice.

Also included in the collection are some of McClure’s writings, speeches, and lecture notes, research and teaching files, diaries, and photographs. Some items of note include a diary McClure kept while at Woods Hole, Massachusetts in 1888; a diary of a trip to Greenland in 1899 as part of the Peary Relief Expedition; and a set of negatives and lantern slides of photographs from botanist David Fairchild from his research and travels as part of the Allison V. Armour Expeditions of 1925-1927. Geography and plant life from Europe, North and West Africa, the Canary Islands, and South Asia are documented in these photographs.

In addition, there is an essay, "The Monastery," in which McClure describes the living arrangements of various groups of faculty (himself included) at Princeton from the 1880s until 1937. There are also drafts of a speech, "The Early Life of Charles F.W. McClure", which chronicles McClure’s childhood in Massachusetts, his time as a sheepherder in Texas, his decisions to attend Princeton and to study biology, and the course of his career.

Access and Use

Access

Collection is open for research use.

Restrictions on Use and Copyright Information
Acquisition and Appraisal

Provenance and Acquisition
Gift of Professor Charles F.W. McClure in 1950 (AM 13965; AM 14164) and 1955 (AM 15510). Gift of Mrs. E.D.H. Johnson in 1960 (AM 17051).

Appraisal
No materials were removed from the collection during 2018 processing beyond routine appraisal practices.

Processing and Other Information

Preferred Citation
Identification of specific item; Date (if known); Charles F. W. McClure Papers, Box and Folder Number; Special Collections, Princeton University Library.

Encoding

Correspondence, 1852-1947 April 12

Description: Primarily consists of correspondence from zoologists, biologists and anatomists of the international academic community, with a bulk of the letters coming from his close associates, including his former instructor Henry Fairfield Osborn (whom McClure would later succeed at Princeton) and his frequent collaborator, George Sumner Huntington, professor of anatomy at the Columbia University College of Physicians and Surgeons. Additionally, there is correspondence from several of McClure's Princeton University colleagues and administrators, including Christian Gauss, James McCosh, Harold W. Dodds, Charles McAlphin, and Woodrow Wilson. Other notable correspondents include Alexander Agassi, Alexander Graham Bell, Laurence Hutton, William Sedgewick and animal dealers William Bartels and J.S. Edwards. Letters to his wife, Grace McClure, are also included.

Arrangement: Arranged alphabetically by correspondent.

Letters to Grace McClure, 1927-1938  Box: 8 Folder: 37

Research Papers, Speeches, and Lectures, 1907-1928 January 20

Description: Includes drafts and copies of research papers, speeches, and lectures written by McClure, some of which were co-authored with colleagues. Additionally, there is an essay, "The Monastery," in which McClure describes the living arrangements of various groups of faculty (himself included) at Princeton from the 1880s until 1937. There are also drafts of a speech, "The Early Life of Charles F.W. McClure", which chronicles McClure’s childhood in Massachusetts, his time as a sheepherder in Texas, his decisions to attend Princeton and to study biology, and the course of his career

Arrangement: Materials were arranged chronologically.

The interpretation of variations of the postcava and tributaries of the adult cat, based on their development, Parts IV and VII (written with George S. Huntington), 1907  Box: 9 Folder: 1

An analysis of experimental edema in the anura, 1919 July 29  Box: 9 Folder: 2

The Recent Endothelial Controversy, 1920  Box: 9 Folder: 3

The development of the veins in the domestic cat (Felis domestica) with especial reference, (1) to the share taken by the supracardinal veins in the development of the postcava and azygos veins and (2) to the interpretation of the variant conditions of the postcava and its tributaries, as found in the adult (written with George S. Huntington), 1920  Box: 9 Folder: 4
Huntington and McClure Diagrams, 1920
The development of the vena cava inferior in man (written with E.G. Butler), 1925
George Sumner Huntington, Anatomist, 1928 January 20
The Monastery, undated
Early Life and Education of Charles F. W. McClure, undated
Research Paper Notes, undated

Research Files, 1830-1929

Description: Includes collected abstracts and illustrated figures related to McClure's research. Documents and photographs, in the form of negatives and lantern slides, related to botanist David Fairchild's travels as a participant of the Allison V. Armour Expeditions of 1925-1927 are also included. Geography and plant life from Europe, North and West Africa, the Canary Islands, and South Asia are documented in these photographs.

Abstracts of Anatomical Papers, 1830-1897
