Félix Candela Papers, 1767-2007 (bulk 1924-1997): Finding Aid

Summary Information

| Call number: | C1455 |
| Repository:  | Princeton University Library. Special Collections. Manuscripts Division. One Washington Road Princeton, New Jersey 08544 USA |
| Size:        | 32.0 linear feet  
37 archival boxes |
| Language(s) of Material: | Spanish or Castilian  
English |
| Abstract:    | Félix Candela was an influential Spanish-born architect and structural engineer, known for his innovative designs using reinforced thin-shell concrete to create the highly efficient hyperbolic paraboloid shapes used in his construction of many well-known churches, factories, and other buildings, primarily in and around Mexico City in the mid-20th century. The collection consists of professional and personal papers, including photographic files documenting his projects, architectural drawings and designs, drafts of lectures and published papers, correspondence, appointment books, student notebooks and artwork, personal photographs and albums, awards and certificates, architectural reference books and magazines, construction materials catalogs, and clippings on various |
architecture and design topics and on Candela's own work.

Location: This collection is stored partially onsite (photographic materials and architectural drawings, boxes 1-11 and 14) at Firestone Library and partially offsite (boxes 12-13, 15-37) at the ReCAP facility.

**Contents List** ...............................................................................................................................................................
Félix Candela (1910-1997) was an influential Spanish-born architect, structural engineer, and builder, known for his innovative designs using reinforced thin-shell concrete to create the highly efficient hyperbolic paraboloid shapes used in his construction of many well-known churches, factories, and other buildings, primarily in and around Mexico City in the mid-20th century. His work is known for its unique shapes and forms as well as its highly efficient use of readily available materials. After gaining recognition for his early work in Mexico as a designer and master builder, Candela went on to serve as a structural consultant for projects around the world.

Born in Spain, Candela studied architecture at La Escuela Técnica Superior de Arquitectura de Madrid from 1927 to 1935. Just as he was leaving to pursue further formal education in Germany, his studies were quickly interrupted by the start of the Spanish Civil War in 1936, when Candela returned to Spain to fight with the Spanish Republic against Francisco Franco and the Nationalists. During the war, he gained pragmatic construction experience as the Republic's Captain of Engineers, working to restore buildings for military use. Candela was imprisoned in an internment camp in Perpignan, France, until the end of the war in 1939, at which point he moved to Mexico as an exile and adopted Mexican citizenship in 1941.

After gaining experience working as an architect, engineer, and builder of traditional beam and column construction in Mexico in the 1940s, Candela started his own company, Cubiertas Ala S.A., along with his siblings, Antonio and Julia Candela, in 1950. Their company, which specialized in reinforced concrete shell and laminar structures, flourished in the decades following the Mexican industrial boom, leading Candela to build over 300 works and participate in over 900 projects. Candela's 1950 design for the Pabellón de Rayos Cósmicos on the Universidad Nacional Autónoma de México campus was the first to employ his novel hypar shell structure, and remains one of his best-known works. Although he never formally studied shell design and construction, Candela developed his expertise in this area through self-education and hands-on experimentation.

Throughout the 1950s and 1960s, Candela built his reputation by designing and building many structures utilizing variations on the hyperbolic paraboloid shape, including the Iglesia de la Medalla Milagrosa (1953), Capilla Lomas de Cuernavaca (1958), Los Manantiales Restaurant at Xochimilco (1958), and the Bacardi Rum Factory in Cuautitlán (1960). His design was also chosen for the Sports Palace used in the 1968 Olympic Games in Mexico City. Beginning in the 1950s, Candela also made a point of regularly publishing papers and lecturing publicly at conferences and events around the world, arguing fervently against traditional means of structural analysis. His professional contributions afforded him a role as a leader in the field of thin-shell construction. Candela began working as a professor and academic lecturer in the early 1950s, including at the Universidad Nacional Autónoma de México (1953-1970), Harvard University (1961-1962), and the University of Illinois (1971-1978). He resided in the United States permanently after 1971, where he eventually became a citizen in 1978. He died in Raleigh, North Carolina in 1997.

The collection documents the professional and personal activities of Félix Candela over much of his lifetime and contains a diversity of materials ranging from his childhood photographs from the
1910s and notes from his school days in the early 1930s in Madrid, to photographs, architectural drawings, writings, and correspondence, representing his life and professional contributions to the field of architecture from 1950 until his death in 1997.

The papers contain a wide range of photographic media documenting Candela's buildings under construction and following completion, architectural drawings, plans, calculations, and notes for some of his famous churches, stadiums, and factories, typescripts, drafts, and clippings of lectures and published articles on various topics related to structural analysis and design, a group of professional and personal correspondence, as well as travel itineraries and receipts related to his participation in international architecture conferences and gatherings. Also included are Candela's appointment books and personal expense ledgers, student artwork, college course notebooks and study guides, awards and certificates honoring his work, personal and travel photographs, identification papers and official documents, reference files and clippings on different architectural styles and topics, clippings of writings by and about Candela, and several VHS tapes regarding his work.

Rather than serving as traditional project or business files, such as his Cubiertas Ala office files, which are held elsewhere, these papers provide a broader view of Candela's personal life and practice of architecture, including ample photographic documentation of his buildings and major structural achievements using hypars, fans, umbrellas, and other unique shapes. Also represented here are materials related to Candela's role as a lecturer and proponent of efficient thin-shell design at international architecture conferences and colleges, as well as materials demonstrating the relationship between his education and the trajectory of his professional career. The original arrangement of Candela's files was preserved when it was discernable, and often observes thematic relationships rather than strict chronological or other practical divisions.

Researchers should be aware that, in keeping with the bilingual nature of materials in this collection, Candela labeled some of his files in Spanish and others in English. Original folder titles were transcribed in the language in which they were found, and thus reflect this variation. Occasionally, a folder with a title in Spanish is followed by another folder with the same title in English. This practice reflects original divisions of some materials by language, and reflects Candela's international practice. When no original file labels were present, titles were generally supplied in English.

Access and Use

Access

This collection is stored partially onsite (photographic materials and architectural drawings, boxes 1-11 and 14) at Firestone Library and partially offsite (boxes 12-13, 15-37) at the ReCAP facility. Please consult with the Special Collections about having the collection recalled to Firestone Library for your use. This process normally requires 48-72 hours notice.

This collection is open for research.

Restrictions on Use and Copyright Information

Single photocopies may be made for research purposes. No further photoduplication of copies of material in the collection can be made when Princeton University Library does not own the original. Inquiries regarding publishing material from the collection should be directed to RBSC Public Services staff through the Ask Us! form. The Trustees of Princeton University hold the copyright for materials in this collection that were created by Félix Candela.
Acquisition and Appraisal

Custodial History
Prior to their move to the Special Collections, the Félix Candela Papers were housed at the Department of Civil and Environmental Engineering, where they were used as research materials for Maria Garlock and David Billington's book, Félix Candela: Engineer, Builder, Structural Artist (Princeton University Art Museum, 2008). Maria Garlock facilitated Dorothy Candela's donation of these materials to Princeton University beginning in 2006-2007, as an addition to what was then referred to as the Maillart Archives.

Provenance and Acquisition
Gift of Dorothy Candela in 2006-2007, as confirmed in writing by her daughter, Jane Struble, in 2013 (AM 2014-6).

Appraisal
All materials were retained during 2014 processing, with the exception of a blank internal hard drive, which was discarded.

Related Materials

Related Archival Material
Additional architectural records and papers of Félix Candela, including his office files from Cubiertas Ala, are held in the Department of Drawings and Archives at the Avery Architecture and Fine Arts Library at Columbia University.

Processing and Other Information

Preferred Citation
Identification of specific item; Date (if known); Félix Candela Papers, Box and Folder Number; Manuscripts Division, Special Collections, Princeton University Library.

Encoding
This finding aid was produced using the Archivists' Toolkit 2014-08-19T13:02-0400

Descriptive Rules Used
Finding aid content adheres to that prescribed by Describing Archives: A Content Standard.

Arrangement: This series is arranged into three subseries: Conceptual Files, Slides and Negatives, and Photographs for Félix Candela: Engineer, Builder, Structural Artist.

Description: This series contains materials related to Félix Candela's professional work as an architect, structural engineer, and master builder, both for his own company and as a technical advisor for other firms. Included are many black-and-white and color photographs, slides, negatives, and transparencies showing Candela's finished structures and works under construction, along with some architectural drawings, sketches, and designs, and a smaller quantity of maps, calculations, and project files pertaining to specific buildings. Rather than serving as traditional architectural project files, the materials in this series document the design, construction, and completed forms of many of Candela's buildings, primarily through photographs, and secondarily, through Candela's architectural drawings and specifications, which provide insight into his design process. This series includes an original run of conceptual files on specific buildings, arranged by architectural feature or theme, that contain both photographic materials and architectural drawings. Also present is a group of slides and negatives of Candela's work, along with microfilms of technical articles related to his projects, that he organized separately by medium, and additionally, a group of Candela's photographic materials, which were later arranged based on their use for research and publication in a book by Maria Garlock and David Billington, Félix Candela: Engineer, Builder, Structural Artist (Princeton University Art Museum, 2008). These divisions were preserved in order to maintain contextual evidence regarding use and original organization. Researchers looking for photographs of a specific building should note that relevant materials may therefore be present in all three subseries.

Candela's architecture practice focused on the design of roofs and enclosures for buildings. His drawings and papers reflect this practice in that they demonstrate the overall design principles and geometrical logic of the building, rather than provide detailed construction sets. Similarly, photographs of Candela's buildings under construction tend to depict the erection of the shell, along with any related scaffolding and concrete pouring, rather than any work on the interior of the building. While photographs and other materials related to most of Candela's major works and many of his smaller projects are included in this series, some of the most thoroughly represented include La Milagrosa (Iglesia de la Medalla de la Virgen Milagrosa), Los Manantiales Restaurant at Xochimilco, Capilla Abierta Lomas de Cuernavaca, the Bacardí Rum Factory, Palacio de los Deportes for the Mexico City Olympic Games, Bernabéu Real Madrid Stadium, and L'Oceanogràfic, an oceanarium and restaurant in Valencia.

Subseries 1A: Conceptual Files, 1935-1997

Arrangement: Arrangement follows original order, wherein files on individual building projects are organized into groups based on an architectural feature or theme, following a Roman numeral outline.

Description: This subseries contains photographs, negatives, transparencies, architectural drawings and reproductions, sketches, and calculations, along with occasional project files,
notes, and correspondence regarding a wide range of Félix Candela's building and design projects. Files on specific building projects are organized into twelve conceptual categories based on a topic, generally a specific architectural feature or theme, following their original organizational logic. Rather than providing complete project files, these files primarily visually document finished projects and projects under construction. Contents are mainly photographic in nature, accompanied by architectural drawings for some projects, and less often, paper files. Accordingly, materials in individual files are primarily photographic, unless otherwise noted at the file level.

While materials are listed in their intellectual order, they are boxed by size. Researchers should note that they may need to consult more than one box in order to view all materials related to a particular project. Oversize architectural drawings were stored flat in mylar when possible. Occasionally, large rolled architectural drawings that are too large or curled to store flat have been enclosed in mylar, wrapped around an archival tube for protection, and secured by a piece of cloth tape tied in a simple bow. Researchers consulting these drawings should take care to preserve this arrangement when returning these items to their containers.

0. Proyectos y Obras Anteriores a los Cascarones y Cubiertas ALA, 1935-1945
   Physical Characteristics: Two photograph albums
   Description: Albums include photographs of early projects, some completed and others under construction, including P.F.C Plaza de Toros, Hospital San Vicente, Hotel Catedral, as well as construction projects in Tepotzotlán, Cuernavaca, Guamúchil, and others. Some personal and family photographs are also included. Also present is a photocopied list of works that Candela included conceptually within this file group.

   Box: 1 Folder: 1-2

I. Primeros Intentos: Bóvedas, Conoides, Cúpulas, circa 1950s
   Description: Includes a photocopied list of works that Candela included conceptually within this file group. It should be noted that not all works listed are represented in the collection.

   Box: 2 Folder: 1-2

I. Primeros Intentos: Fábrica de Fernández, Piñero Deportes, 1951
   Physical Characteristics: Oversize photographs

   Box: 3 Folder: 1

II. Naves Con Paraguas: Almacenes Río, 1954
   Description: Includes notes about the organization and contents of "II. Naves Con Paraguas".

   Box: 2 Folder: 3

II. Naves Con Paraguas: Encofrados de Tubo, Construcción, 1955

   Box: 2 Folder: 4

IX. Proyectos Hypar Como la Estructura Secundaria: University of Riyadh Stadium Roof Plans, 1985

Physical Characteristics: 3 rolled architectural designs
Description: Plans for a sports stadium on the campus of Imam Mohammed Ben Saud Islamic University in Riyadh, Saudi Arabia.

IX. Proyectos Hypar Como la Estructura Secundaria: Estadios, 1982-1997
   Description: Includes calculation tables and sketches.

IX. Proyectos Hypar Como la Estructura Secundaria: Photocopies, undated

X. Otras Cosas: Otras Estructuras Metálicas, Maquetas, Estadios, 1967-1977

X. Otras Cosas: Commonwealth Games Stadium, 1973-1975
   Description: Includes a copy of the "Commonwealth Games Management Financial Feasability Study", drafted by Associated Engineering Services Ltd. (Canada), along with related correspondence.

X. Otras Cosas: Asociación Praeger-Kavanagh-Waterbury-Candela, 1971
   Description: Includes correspondence, studies, calculations, and brochures regarding various stadium projects on which Candela worked in collaboration with the Praeger-Kavanagh-Waterbury firm, including materials regarding the Pontiac Metropolitan Stadium in Detroit.

X. Otras Cosas: IDEA Center Yanbu, 1979-1984
   Description: Includes project and personnel files.

X. Otras Cosas: L'Oceanogràfic, circa 1997
   Description: Includes calculations and photocopies of small drawings and sketches for the oceanarium and restaurant in the Ciutat de les Arts i de les Ciències in Valencia, Spain, along with some photographs and ephemera collected by Dorothy Candela following the structure's completion.

   Physical Characteristics: Architectural drawings and copies
   Description: Includes 6 original small pencil sketches on tracing paper, along with several photocopies of sketches, computer-generated designs, and landscape drawings for the restaurant. Also contains one newspaper clipping that was originally stored with these materials.

   Physical Characteristics: Oversize architectural drawings and copies

X. Otras Cosas: Catenary Hypar Structures, 1972-1973
   Description: Includes notes and photocopies of architectural plans for umbrella structures used as supports in various metro stations, including San Lázaro and Metro Candelaria.
X. Otras Cosas: Photocopies, undated
Box: 8 Folder: 17

XI. Obras Otros Arquitectos Amigos y Colaboradores, 1966-1988
Description: Includes images of works by Florentino del Pozo, Emilio Perez Piñero, Fernando Higueras, as well as a CD-ROM containing Higueras's curriculum vitae.
Box: 8 Folder: 18

Some Examples of the Work of Félix Candela, 1954-1962
Description: Contains captioned color photographs, showing various churches Candela designed in Mexico and the United States in the 1950s and 1960s.
Box: 8 Folder: 19

Architectural Support Drawings, undated
Physical Characteristics: 2 architectural drawings
Box: 5 Item: 29-30

Unidentified Architectural Drawings, undated
Physical Characteristics: 4 architectural drawings
Description: Includes two drawings of two different versions of a church, and two geometrical drawings of angles.
Box: 4 Folder: 5

Map of Buildings by Cubiertas Ala in Mexico City, circa 1960s-1970s
Description: An additional Xerox copy of the map is located in Box 4, Folder 6.
Box: 36

Topographical Map of Madrid, 1986
Box: 5 Item: 31

Subseries 1B: Slides and Negatives, bulk 1950-1980, 1930s-2002

Arrangement: Numerically arranged slides are followed by slides arranged alphabetically by subject, then negatives arranged alphabetically by subject.

Description: This subseries includes slides and negatives documenting Candela's work that he arranged by medium type and kept separately from the photographic materials included in his conceptual files. The largest group of slides follows an original numerical order that corresponds to an accompanying inventory, which can be found in Box 8, Folder 20. Researchers should consult this inventory when searching the numerical slides for images of specific buildings. Although most slide sheets include pictures of several different buildings, their original order was maintained to preserve context. Also present are slides that Candela kept by topic, arranged alphabetically, as well as a group of photographic negatives of works by Candela and microfilmed copies of technical articles on various structural engineering concepts. Slides are primarily in color and often individually marked with their location, while negatives are mainly in black-and-white and occasionally in color. Negatives were often unmarked with any identifying information, although this information was preserved when it existed. While most slides and negatives were sleeved in archival preservers, a group of unsorted negatives that were too curled to be unrolled safely were stored separately in small bags within an artifact box. A small amount of nitrate film was segregated for cold storage.
It should be noted that slides used for research or publication in Félix Candela: Engineer, Builder, Structural Artist, which were physically removed from Candela's original arrangement, can be found in Subseries 1C.

**Numerical Slide Inventory, undated**

Description: This inventory was received with the collection and provides a list of images that appear on each sheet of numerical slides.

| Box: 8 Folder: 20 | Numerical Slides: Sheet 1.2-1.10, 1950s-1980s |
| Box: 8 Folder: 21 | Numerical Slides: Sheet 1.11-1.20, 1950s-1980s |

Unidentified Rolled Negatives, 1930s-1970s
Box: 12

Separated Nitrate Film, 1940s-1950s
Box: 13

Arrangement: Photographic materials are arranged topically, following the order in which they were arranged for the book.

Description: This subseries contains photographs, slides, and negatives that are arranged based on their use as research materials or published images for Félix Candela: Engineer, Builder, Structural Artist, a scholarly book on Candela and his work by Princeton professors Maria Garlock and David Billington, which was published by the Princeton University Art Museum in 2008, in conjunction with an exhibition of the same title that ran from October 10, 2008 through February 22, 2009. While materials in this subseries also depict the construction and completion of many of Candela's major building projects, their arrangement reflects their use in the book rather than their original order in Candela's personal papers. This subseries includes a group of images published in the book, arranged by its authors by chapter and marked with the corresponding figure number. Occasionally, images are accompanied by notes about their location in the original arrangement. Also present are topical photographic files based on major projects or types of structures, which formed focal points for the book.

Félix Candela Book Original Images, 1910s-2007
Box: 14 Folder: 1-2

Description: Contains a set of slides, photographs, and negatives from Candela's collection of personal and professional photographs that were
Series 2: Talks and Articles ... (Continued)

published in Félix Candela: Engineer, Builder, Structural Artist, arranged by chapter in the order in which they appeared in the book, although there may be some minor variations from their layout in the final text.

Scanned Slides, circa 1960s-1970s Box: 14 Folder: 13-14
Scanned Negatives, circa 1952-1954 Box: 14 Folder: 15-16

Series 2: Talks and Articles, 1937-1997

Arrangement: This series is arranged into three file groups, following original order: Lectures and Papers, Travels, and Articles.

Description: This series includes drafts, typescripts, handwritten notes, and clippings of Candela's lectures and published papers, itineraries, receipts, and correspondence related to his international travels and participation in conferences worldwide, along with drafts and clippings of his published articles and translations. These materials, which Candela filed together, pertain broadly to his role as a leader in the field of architecture and as an advocate for innovative methods of thin-shell concrete design. Beginning in the 1950s, Candela became an outspoken proponent of a new type of structural analysis that de-emphasized overly complex mathematical calculations in favor of a more thorough theoretical understanding of forms based on principles of geometry. His public lectures and writings promoted an economy of design that was not divorced from aesthetic concerns, made strong arguments against
classical structural analysis, and at the same time, attracted attention and publicity to his firm, Cubiertas Ala. Materials in this series reflect Candela's regular participation in international professional conferences, meetings, and publications related to architecture and structural design, and the viewpoints he promoted. Some writings and typescripts of Candela's lectures regarding topics tangential to architecture, such as politics and urban planning, are also included.

File groups in this series reflect Candela's original organization of the materials, and his original folder titles were retained when they were present. Researchers looking for drafts of articles by Candela should note that many of his published articles originated as lectures, and are filed as such, sometimes alongside clippings of the resultant article in print. It should also be noted that materials filed under travels often contain correspondence, receipts, and notes related to conferences and other events at which Candela presented papers, drafts of which are filed separately with his lectures and papers. While materials in this series are the most comprehensive for Candela's activities from 1950 through the early 1970s, some earlier and later materials are also present.

Size: 3 archival boxes

Arrangement: Files are arranged chronologically, following their original order.

Description: This file group includes drafts, typescripts, and notes for lectures and papers given at various conferences and public events, and occasionally, clippings of later published versions of these works. Sometimes two files with the same title, one in English and one in Spanish, are present. This arrangement is original and reflects Candela's filing system, wherein he often kept his writings in Spanish separate from their English translations, and vice versa.

Description: Includes technical articles about warped surfaces translated by Candela.

Estudio del Paraboloide Hiperbólico Sometido a su Propio Peso, circa 1950s-1970
Box: 17 Folder: 7

Description: Includes writings by Candela, with his English translations.

Artículos Traducción por Félix Candela, 1937-1973
Box: 17 Folder: 8-9

Description: Original folder was retained and includes a detailed list of contents.

Artículos con Cálculos y Demostraciones por Félix Candela, circa 1949-1975
Box: 17 Folder: 10
Series 3: Correspondence, 1953-2000

Arrangement: Alphabetical correspondence files, arranged by topic or correspondent, are followed by chronological professional correspondence files, then chronological personal correspondence files.

Description: This series includes a group of professional and personal correspondence of Félix Candela, beginning in the 1950s. Professional correspondence primarily regards Candela’s participation in several professional associations and committees, his various awards and appointments, teaching and lecturing opportunities, inquiries from graduate students writing about his work, and occasionally, building projects. Correspondence is organized in two ways, following the original groupings of materials. Professional correspondence files that Candela
kept by topic or correspondent retain their original folder titles when present. Both professional
and personal correspondence files that Candela grouped chronologically retain that order. In
addition to letters to and from his family and friends, personal correspondence also includes
some letters between Dorothy Candela and others following the death of Félix Candela in
1997.
Researchers looking for correspondence files related to specific lectures, travels, conferences,
or articles should also consult relevant files in Series 2, as Candela often kept additional
correspondence within his topical files on various events and projects. It should also be
noted that the correspondence files in this series are not comprehensive. Much of Candela's
professional correspondence, especially files regarding specific building projects, resides at
the Avery Architectural and Fine Arts Library at Columbia University, with the papers from his
company, Cubiertas Ala. The correspondence files in this series represent those he retained
separately with his own papers.

American Concrete Institute Committee, 1957-1960

Mangus, Alfred, 1977-1983
  Description: Includes a photocopy of Mangus's master's thesis, titled Review
  Games, along with a letter addressed to Candela and several architectural
  journals and clippings used as sources.
  Box: 18 Folder: 11

Parsons School of Design Structures Course, 1983
  Description: Includes correspondence and class notes.
  Box: 18 Folder: 12

Royal Institute of British Architects, 1992
  Box: 18 Folder: 13

Arrangement: This series is arranged into five subseries: Appointment Books, Student Work, Autobiography Materials, Personal Photographs, and Awards.

Description: This series contains materials primarily related to Candela's personal life and activities, including appointment books, financial ledgers, address books, student notebooks, drawing portfolios, study guides, autobiographical writings with related clippings and documents, personal photographs of Candela traveling with his family, and various awards and honorary certificates he received throughout his career. Contents range from school work and black-and-white photographs from Candela's early education and athletic career in Spain to contemporary color photographs of Candela in his later years traveling in Europe and South America alongside his wife, Dorothy Candela. A complete run of appointment books spanning from 1968 until 1997 is also present, containing a great deal of information about his daily activities and interactions.

While materials in this series are primarily personal in nature, some also shed light on aspects of Candela's professional career, including his school notebooks and copies of study guides he wrote for structural engineering courses in college, autobiography drafts that detail his professional activities, and certain notes in his appointment books that trace his meetings with collaborators, work habits, construction schedules, travel plans, and lecture and conference participation. Of note is a draft copy of Candela's unfinished autobiography, written in the mid-1990s, which contains a lengthy and thorough narrative of his architectural career and his personal history leading up to it. Also included with the notes for his autobiography are several
original personal documents and identification papers, such as passports and immigration
documents from the various countries in which he held citizenship during his lifetime.

Arrangement: Appointment books are arranged chronologically, with financial ledgers and
address books at the end.

Description: From 1968 until his death in 1997, Candela scrupulously kept daily appointment
books, in which he often took notes in great detail on his day-to-day activities, primarily
regarding his personal life, but also pertaining to some professional meetings and events.
This subseries contains a comprehensive set of these appointment books covering a
span of almost 30 years. While appointment books for some years contain more sparse
notes, most contain frequent and detailed descriptions of Candela's meals, travels, phone
conversations, progress with construction and renovation work on his home, personal
relationships, and other matters. Also included are occasional notes about his travels
to give lectures and presentations at universities and conferences around the world, his
deadlines for providing drawings for design projects and collaborations, and financial
matters regarding payment for his work. In addition to appointment books, this subseries
also includes two expense ledgers that Candela kept alongside his daily planners, regarding
his properties and his children, as well as several address books and loose pages from
address books, which are filled with information about his personal and professional
contacts.

### Subseries 4B: Student Work, 1924-1936

#### Arrangement:
Arranged chronologically.

#### Description:
This subseries includes materials related to Candela's education in architecture and structural engineering, including his preparatory drawing examinations along with notes and study guides for college courses that he took in Spain in the early 1930s. Of note are Candela's class notebooks, which contain his calculations and transcriptions from D. Luis Vegas's "Resistance of Materials" course on the theory of elasticity, which Candela took in his third year of study at La Escuela Técnica Superior de Arquitectura de Madrid. He was an

exceedingly successful student in the class and later served as an assistant to the professor for the same class the following year. He also tutored other students on topics from his "Descriptive Geometry" class. Candela's notes from some of these university courses are included in this subseries, as well as study guides that he wrote based on Vegas's curriculum for "Resistance of Materials", in collaboration with his classmate, Alejandro Herrero. Also included is a portfolio of statue and figure drawings in charcoal that Candela completed as part of a preliminary examination required for entry into the architecture college, which display his artistic abilities.

Ejercicios de Dibujo por el Alumno Félix Candela, 1924-1925
Box: 22
Description: Includes a portfolio of 27 charcoal still life drawings of people and statues by Félix Candela for an examination at the Colegio de San Ignacio in Madrid.

ASCE Meeting Notes, 1935
Box: 37 Folder: 6

Arrangement: Files are not arranged according to any arrangement scheme.

Description: Félix Candela wrote an autobiography in the 1990s, which was never finished. This subseries contains a copy of the complete draft of the existing autobiography, along with preliminary materials, including detailed chronologies of life events and professional projects, early chapter drafts, selected bibliographies of writings by and about Candela, lists of completed architectural works, and clippings regarding Candela and his life's work. Autobiography drafts are primarily print-outs of documents typed on a computer, for which the corresponding digital files are not a part of the collection. Also present are a transcript of an extensive recorded interview with Rafael López Palanco in 1985, several unattributed cartoon sketches of Candela, and a group of identification papers, including passports, citizenship papers, and other official documents and copies. Researchers should note that these materials are primarily in Spanish.

Chronologies and Chapter Drafts, 1990-1994 Box: 23 Folder: 3-6

Description: Includes a few pieces of related correspondence.

Selected Bibliography and Clippings, 1950s-1997 Box: 23 Folder: 7

Professional Work List and Clippings, 1970-1996 Box: 23 Folder: 8

Description: Includes typescripts, Xerox copies, and clippings of articles and interviews, likely gathered together as reference materials for Candela’s autobiography.

Recorded Interviews with Rafael López Palanco, 1985 December Box: 23 Folder: 10

Sketches of Félix Candela, 1969 Box: 23 Folder: 11

Identification Papers, 1938-1980 Box: 23 Folder: 12

Description: Includes originals and Xerox copies of Candela's passports, naturalization certificates, and other legal documents.

Subseries 4D: Personal Photographs, circa 1915-2000

Arrangement: Arranged chronologically by topic, with general categories at the end.

Description: This subseries contains personal and travel photographs of Félix Candela, often with his family, including early black-and-white photographs, contemporary color photographs, occasional negatives and slides, and several photograph albums. Early photographs albums from the 1920s-1940s show Candela as a young athlete during his school days in Spain, as well as his trips throughout Spain and Mexico with his first wife, Eladia Martín, and their family. Prior to the Spanish Civil War, Candela was a competitive athlete in Spain, playing for the national rugby team and winning championships in both pole-vaulting and ski-jumping. Of note in this subseries is a group of photographs
showing Candela competing in these and other sports, including skiing, mountain-climbing, pole-vaulting, and rugby. Also present are travel shots of Candela in later years, often accompanied by his wife, Dorothy Candela, also an architect, in locations such as British Guiana, the United States, Spain, Iran, Peru, Argentina, Armenia, Bulgaria, and England. Candela's interest in regional design styles is also reflected in his travel photographs, which include many shots of local architecture, ruins, and churches in the various countries he visited. Photographs of Candela at several gallery openings and exhibitions are also present, along with photographs of him with other architects, including Fernando Higueras.

Youth and Sports Photographs, circa 1915-1930s  
Box: 23 Folder: 13

Spain: Sports Photographs, 1922-1934  
Box: 24 Folder: 1

Physical Characteristics: Photograph album

Description: Photographs primarily depict Candela's early career as a student and athlete in the years prior to the Spanish Civil War. Images show Candela skiing, pole vaulting, and playing rugby.

Valencia and Ibiza: Travel and Architecture Photographs, 1934  
Box: 24 Folder: 2

Physical Characteristics: Photograph album

Mexican Churches and Mayan Ruins Photographs, circa 1940s  
Box: 24 Folder: 3

Physical Characteristics: Photograph album

Description: Includes a sleeve of related loose photographs.

Mexico Teaching Photographs, circa 1940s-1950s  
Box: 23 Folder: 14

Event Photographs, 1950s-1960s  
Box: 23 Folder: 15

Box: 23 Folder: 20

Congreso de la U.I.A. Photographs, 1975  
Box: 23 Folder: 21-22

Description: Second folder includes newspaper clippings, articles, and loose photographs, which were tucked inside the original photograph album.

Machu Picchu Photographs, 1977  
Box: 25 Folder: 1

South America Photographs, circa 1970s-1997  
Box: 25 Folder: 2

MoMA Ricardo Bofill Exhibit Photographs, 1985  
Box: 25 Folder: 3

Description: Includes photographs of Candela with fellow architect, Fernando Higueras.
Subseries 4E: Awards, 1941-1994

Arrangement: Arranged chronologically.

Description: This subseries includes awards, certificates, honorary diplomas, and plaques that Candela received throughout his career recognizing his contributions to the field of architecture. Beginning in the 1960s, Candela garnered an increasing amount of attention and publicity for his work in thin-shell concrete design that lasted throughout his life as he continued to travel and lecture publicly. Although Candela never managed to continue his formal studies following his years in Madrid, he received honorary doctorates from the University of New Mexico, the University of Illinois, and Universidad de Sevilla, as well as an honorary plaque in the 1990s, recognizing his achievements, from La Escuela Técnica Superior de Arquitectura de Madrid, where he completed his education in the 1930s. Most awards and certificates on paper are described at the folder level, with three-dimensional wooden and stone plaques, requiring separate housing due to their size and

Series 5: Reference and Clippings Files, bulk 1939-1997, 1767-2005

Arrangement: Alphabetical subject files are followed by general architectural reference, then clippings on Candela and his work.

Description: This series includes clippings and print materials related to architecture in general, as well as to Candela's own work, that he collected along with his papers as reference materials. After his exile from Spain following the Spanish Civil War, Candela never continued his formal study of architecture. Instead, during his early years in Mexico, he educated himself on the topic of thin-shell construction through independent reading and subscribing to various architectural journals and reviews, some of which he retained and are included in this series. An original run of subject files includes clippings from magazines and newspapers organized topically in folders by building function, architectural style, architect, or geographical location. These files, which retain their original titles, document Candela's design influences while conceptualizing his iconic stadiums, churches, and other buildings, as well as his interest in fellow architects, including Frank Lloyd Wright, Antoni Gaudí, Pier Luigi Nervi, and Eduardo Torroja. Also included in this series are books, magazines, pamphlets, and clippings about
architecture and structural design in general, along with catalogs and brochures for various construction materials and tools. Some clippings and print materials contain handwritten notes by Candela. Clippings from magazines, newspapers, and architectural journals with articles regarding Candela and his work are also present, along with some photocopies of writing about Candela, clippings of obituaries, and VHS tapes about Candela's work.

Subject Files, 1939-1980s

Arrangement: Subject files are arranged alphabetically by topic.

Description: Includes topical reference clippings on various architectural themes and styles.

- Arquitectura Estadios de Deportes, 1959-1973
  Box: 26 Folder: 6
